Craig Grannell talks to Toru Iwatani about how he created the most iconic character in videogames history, devised one of the most enduring and copied game formats, and how he revisited his creation for Xbox 360

With modern-day game characters often being designed and scripted to ape Hollywood movie stars, it's somewhat pleasing to note that a yellow circle with an insatiable appetite for eating pellets remains the most enduring videogaming star to date. After all, which gamer hasn't played some variant of *Pac-Man*? According to a May 2008 report by the Davie Brown Celebrity Index (dbireport.com), which scores celebrities to evaluate potential product spokespeople, *Pac-Man* was recognised by 94 per cent of US consumers, outstripping even *Mario*, which is pretty impressive stuff. *Pac-Man*'s appeal is, ironically, akin to Hollywood heavyweights like Tom Hanks and Will Smith.

Part of this appeal is no doubt down to the fun, peaceful nature of *Pac-Man* and his actual actions. He explores a simple maze, munching dots, pursued by a quartet of cartoon ghosts. When *Pac-Man* eats one of the maze's four power pellets, the ghosts turn blue and flee, having suddenly become edible and decidedly non-threatening. However, even when a ghost is

consumed, its eyes 'escape', hastily retreating to the central ghost pen, whereupon it's reborn.

This gentle, good-natured gameplay was no accident, as the game's designer Toru Iwatani explains. "In the late Seventies, videogame arcades, which in Japan we call 'game centres', were just playgrounds for boys, and the only videogames on offer were brutal affairs involving the killing of aliens," he remembers. "My aim was to come up with a game that had an endearing charm, was easy to play, involved lots of light-hearted fun, and that women and couples could enjoy."

Iwatani started thinking about videogame ideas in which the key word was the verb 'eat'. And, yes, the pizza rumour is largely true – suitably, while at a lunch, a fast-food favourite forever changed the course of gaming history. "With 'eat' established as the key word, a shape caught my eye," recalls Iwatani. "I had ordered a round pizza, and it was missing a piece." In a 'eureka' moment, Iwatani says, "the shape of what is now *Pac-Man* flashed through my mind."

► Toru Iwatani with an altogether cuddlier version of Blinky/Akabei, along with similarly soft versions of *Pac-Man*.
